Database changed
#creaating department table

mysql> -- Create the students table with foreign key relationships
mysql> CREATE TABLE students (
-> student_id INT PRIMARY KEY AUTO_INCREMENT,
-> student_name VARCHAR(100) NOT NULL,
-> dept_id INT,
-> year_id INT,
-> FOREIGN KEY (dept_id) REFERENCES department(dept_id),
-> FOREIGN KEY (year_id) REFERENCES year(year_id)
->);
```

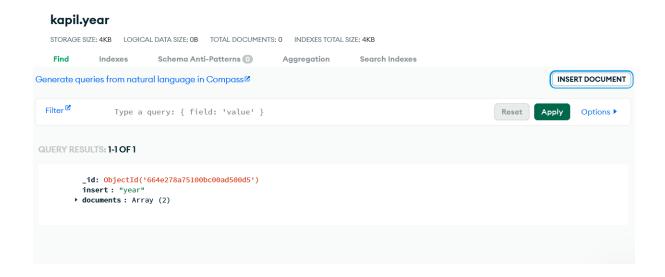

# 3)use chatgpt and ask like "this is my table in mysql how can i create same in mongodb

#### kapil.dept

#### #inserting values into student table

mysql> INSERT INTO students (student\_name, dept\_id, year\_id) VALUES
